MicroPlex Micronutrients™

Proprietary - Chelated Micronutrients Complex

Micronutrients are generally always low in plants and soil due to indiscriminant use of chemicals and heavy commercialized growing methods. This product replaces these very important missing nutrients raising the plants energy, growth, yields, quality, shelf life, taste, all adding up to more profits. The product is organically chelated with our special delivery system Circle Plex System (CPS) for total availability making it the very best in the world.

DIRECTIONS:

Foliar Application: Spray apply 1 to 2 quarts per acre every 6 to 8 weeks mixed with a minimum of 3 gallons of water or as needed to correct deficiencies indicated visually or by leaf tissue tests. For smaller more intensive growing areas, apply at a rate of 2 to 6 ounces with a minimum of 1 gallon of water per 1,000 sq. ft. of turf or foliage.

Soil Application: Apply 1 to 4 quarts per acre as test indicates. For smaller more intensive growing areas, apply at rate of 2 to 4 ounces with a minimum of 1 gallon of water per each 1,000 sq. ft. May be used in all green growing areas. *Apply with any type of spray equipment or through fertigation system. May be mixed with ProActive Agriculture products, but not to exceed 2% total product in any spray solution.*

HAS A SPECIAL CHELATING DELIVERY SYSTEM

IMPORTANT: Always add product last to spray tank containing required amount of water. Rates may vary due to soil tiling methods, climate conditions, and frequency of application. Apply to foliage during early morning or late afternoon. May be used in conjunction with other products. Jar compatibility test recommended.

MicroPlex™ is a new and next generation, totally available and functional. Due to heavy concentration, contents should be stirred or agitated if stored for over 90 days.

Typical Analysis Added by Volume:

Added concentrated sea and land nutrients and minerals, humic acid, amino acids and organic carbons. Also derived from Magnesium, Zinc, Iron, Sodium Molybdate, Manganese and Sodium Borate. Proprietary Organic Chelation delivers totally to plants and soil. This chelation system does not allow for accurate standard lab detection.

Chelated Magnesium as (Mg)
Chelated Zinc as (Zn)
Chelated Iron as (Fe)
Chelated Manganese as (Mn)
Boron as (B)

Coral Calcium + 74 nano minerals
Molybdenum as (Mo)
Combined Sulfur as (S)
Copper
Cobalt

CirclePlex™ Delivery System
